

THANK YOU

June 27, 2009

Our son Brayden has suffered from chronic sinus infections, asthma, allergies, and a compromised immune system since he was 2 years old. Throughout, the last 3 years he was exposed to more doctors, hospitals, tests, and medications than any child should have to endure. We were all at our wits end and so desperate for our son to be happy and healthy. That desperation ended when we found Laubach Family Chiropractic. I spoke to Dr. Laubach on the phone, and explained Brayden's medical history. He assured me that he could help him; I was skeptical and explained that I would talk to my husband. A week later my phone rang and it was Dr. Laubach, he was calling to see how Brayden was doing. I was so touched that a doctor that we never met was calling to see how Brayden was doing. I was so moved by Dr. Laubach's genuine compassion that I scheduled an appointment. That was the day that our lives changed! In the 2 ½ months since Brayden's chiropractic journey began he is happy, healthy and medication free! We can't express how thankful we are for Dr. Laubach and Dr. Poland for giving our child the opportunity to live his life like a typical 5 year old.

With love and appreciation,

Theresa, Neal & Brayden Walsh
