Patient Testimonial

Patient Name Lisa Garcia

Date 3/8/13

Why I Entered the Office:

I entered this wonderful office due to pain, inability to walk properly, numbness in left leg. In 2009, I forgot to mention chronic migraines. I was diagnosed by my neurologist as a cyst on my brain.

How Chiropractic Helped Me:

I began to feel better a month at a time, my numbness subsided, my migraines are so much less due to the adjustments. I have a greater range of motion. I never knew how chiropractic adjustments could do so much to improve ones health. Back to health has improved my quality of life.

Thank you
