Why I Entered the Office:

How Chiropractic Helped Me:

Back in the late 70's I had wrenched my lower back, ~~falling I had slipped~~ on water on the floor.
 ← slipping →

I was out of work for several months on pain killers and muscle relaxers. For the next few years I was in daily pain and unable to bend over and even wash dishes without discomfort.

After running into an old high school friend, who had become a chiropractor, he said chiropractic could help. At first, the visits were more frequent and progress was slow.

Eventually I noticed I had no lower back pain and was able to wash dishes, bend, vacuum without any discomfort.

Since then I have been on monthly maintenance. I highly recommend chiropractic for better health.
