

LAUBACH FAMILY CHIROPRACTIC

Patient Testimonial

Patient Name MICHAEL TOMASULO

Why I Entered the Office:

How Chiropractic Helped Me:

In the early 90's, my lower & upper back began to bother me on a regular basis. I believed some old sports injuries and my lowly golfing were the main culprits. My wife, who regularly received chiropractic care, encouraged me to go to the chiropractor. For many people, I had been skeptical of chiropractors + what and I did not yet understand the value of chiropractic care. As usual, my wife was correct and my taste for the chiropractor soon payed off. After a few months, I thought that since my problems were greatly relieved that my need for further care was also relieved. The doctor and my wife knew better and explained to me once again the value of chiropractic care for a regular maintenance basis (i.e. at least once a month). Ever those days in the early 90's until now, I have received regular chiropractic care from some excellent chiropractors. I have seen first hand and experienced the benefits in my body. One of the greatest lessons I learned about chiropractic care is that its ~~purpose~~ although it can help solve major injuries to our backs, neck etc, its primary purpose is to ~~help~~ help keep our bodies working optimally, thus helping us to enjoy the good health God intended. I ~~just~~ want to thank Doctor Mike + Beth for being excellent chiropractors & for continuing to provide me & my family with excellent chiropractic care.
